

Community action for social emancipation, dignity, and access to rights in vulnerable contexts

1 June 2022

Palau Robert

Passeig de Gràcia, 107
Barcelona

Over 4 years, the project "Integral Ecology for Children's Rights", funded by the "Impresa Sociale con I Bambini" (...) has worked for the promotion, valorisation, and use of community resources' flows for the social emancipation and human development of vulnerable family contexts with children. In this way, it has generated a system that can guarantee concrete access to rights, while being confronted with different starting situations and the additional complications related to the COVID-19 SARS pandemic.

During this meeting, the partnerships of Messina and Brescia (IT) propose a narration of their experience and a comparison with processes that respond to similar needs from other European territories and countries.

It is also an opportunity to get to know the experience of the "Impresa Sociale con I Bambini", conceived and wanted to provide an original and systemic approach to policies for promoting the emancipation of minors and their contexts.

The project was selected by Con i Bambini within the framework of the Fund to combat child educational poverty. The Fund is the result of an agreement between the Foundations of banking origin represented by Acre, the National Forum of the Third Sector and the Government. It supports interventions aimed at removing economic, social and cultural obstacles that prevent children from fully enjoying the educational processes. In order to implement the Fund's programmes, in June 2016 the social enterprise Con i Bambini was set up, a non-profit organisation entirely owned by the Fondazione CON IL SUD. www.conibambini.org
